## Desarrollo de interfaces: primeros pasos PyCharm y Qt-Designer

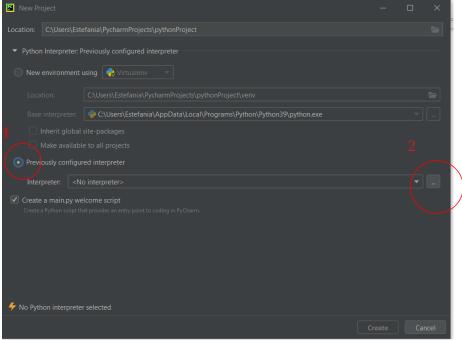

1. Instalar PyCharm (version community gratuita)

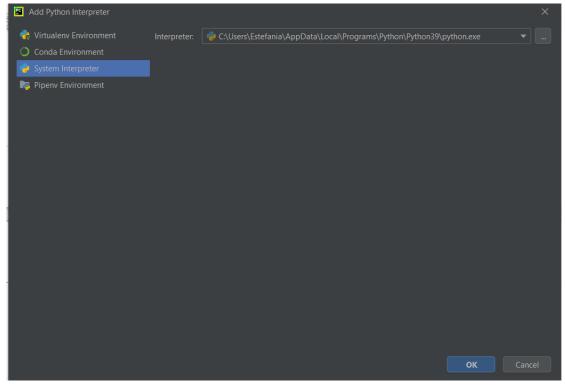

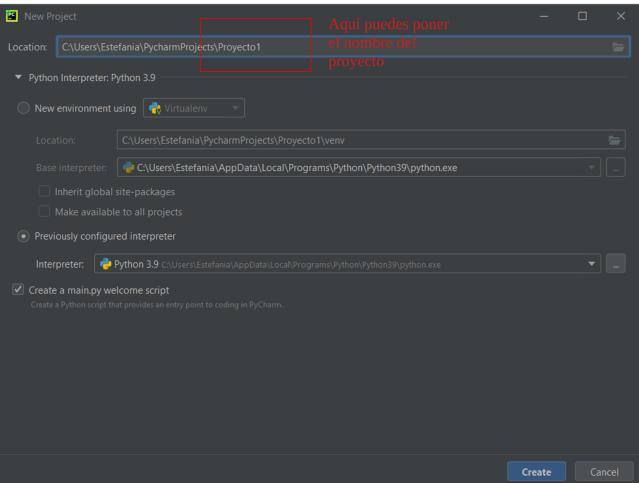

El resto todo lo que viene por defecto.

2. Crear un nuevo proyecto Python en PyCharm

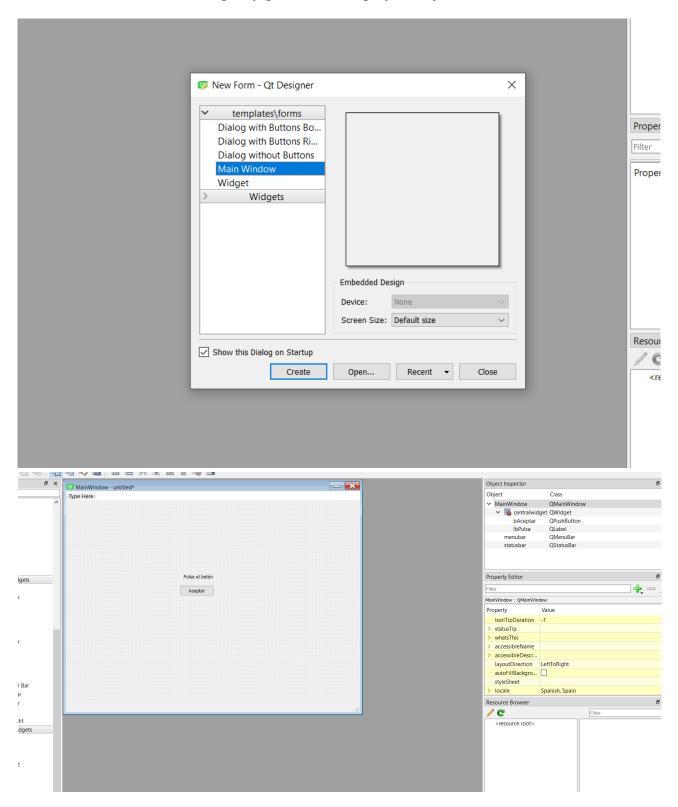

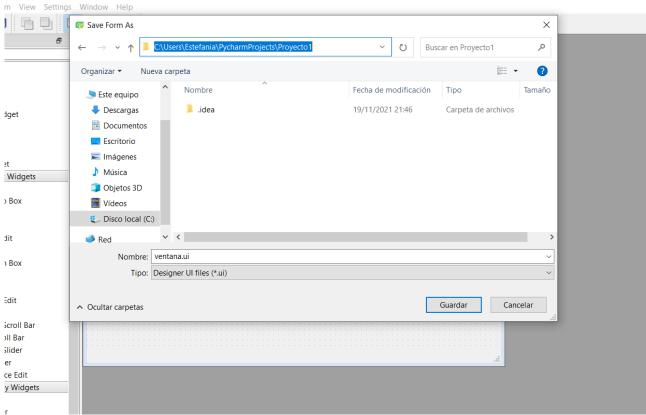

3. Instalar Qt-designer (valores por defecto).

4. Crear una ventana en Qt-designer y guardarla en el proyecto Python anteriormente creado.

## Se guarda dentro del proyecto de python que creaste:

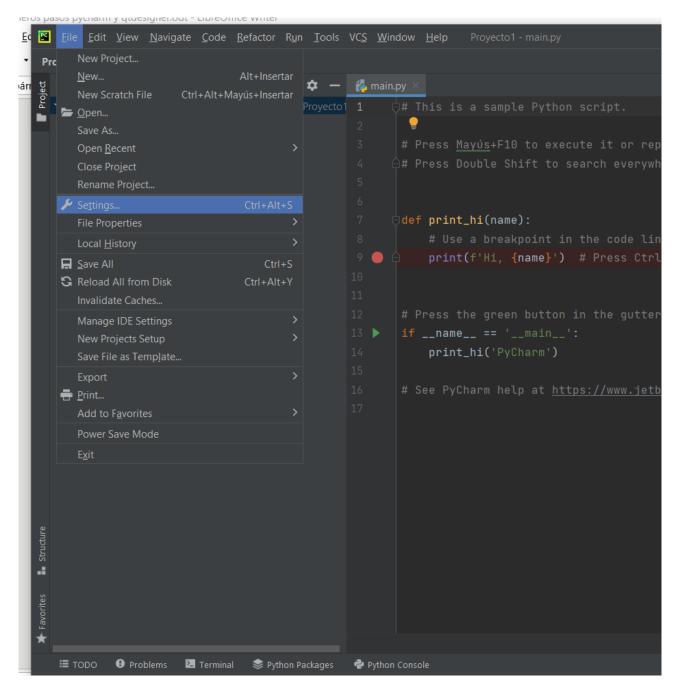

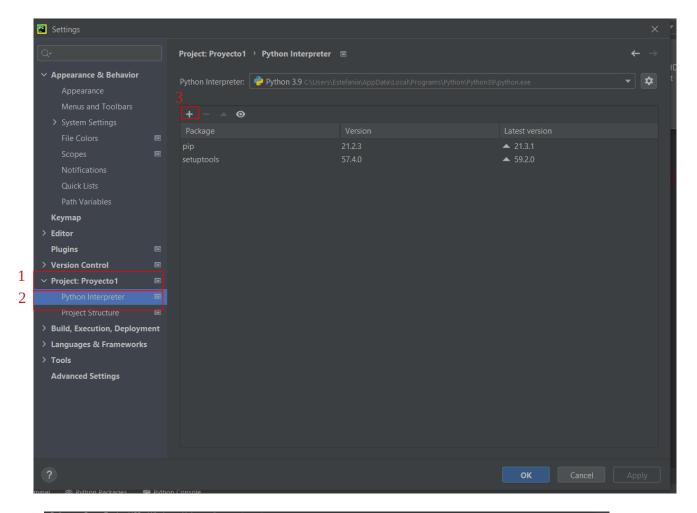

Te aparecerá ya luego en el proyecto en PyCharm:

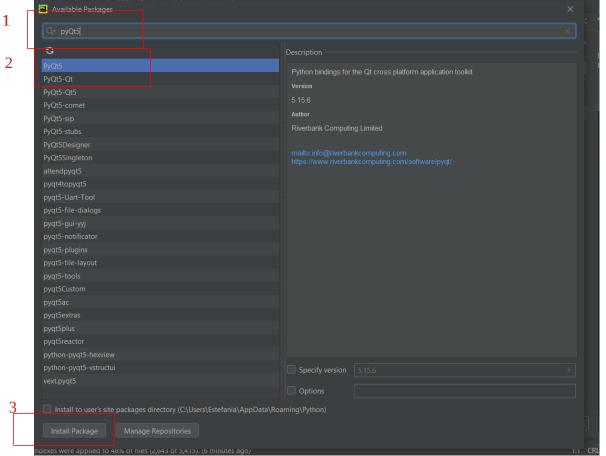

```

Te

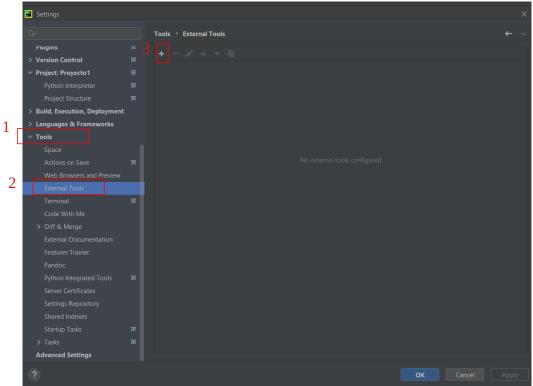

5. Añadir Script en PyCharm para poder convertir de forma automática el archivo creado en Qt-Designer(.ui) a Python(.py).

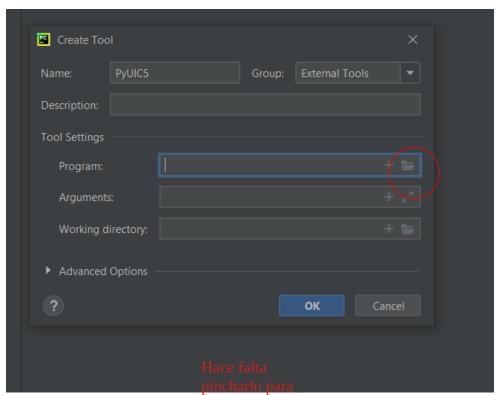

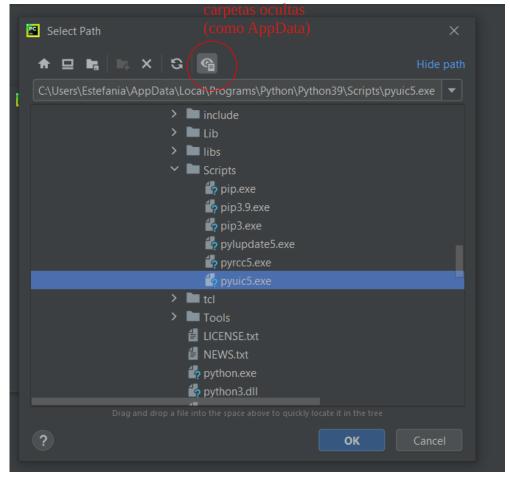

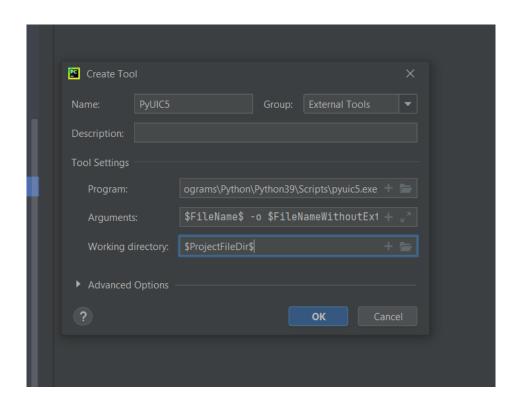

Program:C:\Users\Estefania\AppData\Local\Programs\Python\Python39\Scripts\pyuic5.exe Arguments:\$FileName\$ -o \$FileNameWithoutExtension\$.py Working directorty:\$ProjectFileDir\$

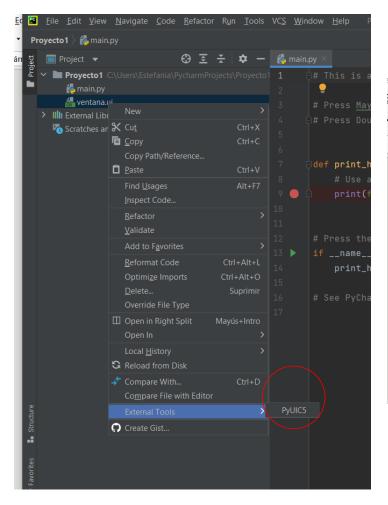

poder ver las

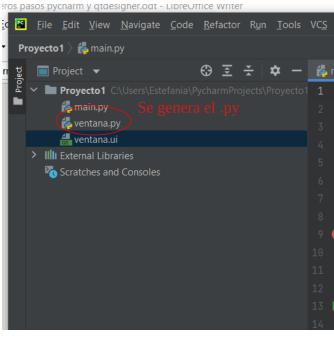

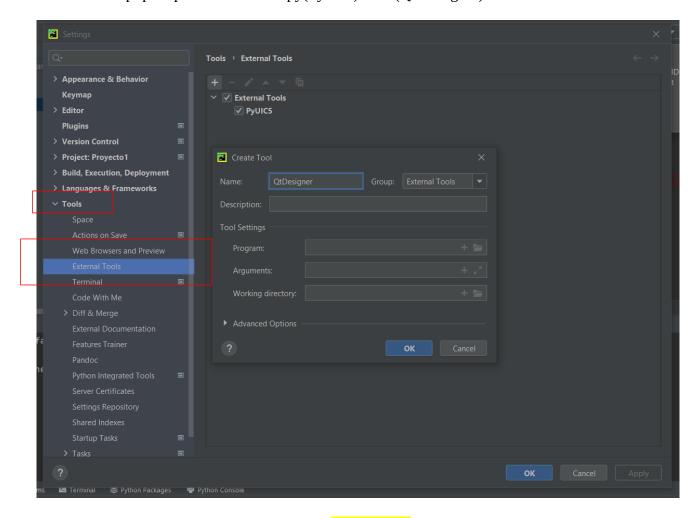

## 6. Crear archivo .py a partir de uno .ui

Click derecho sobre el archivo.ui:

7. Añadir Script para pasar de archivo .py(Python) a .ui (Qt-Designer).

Program: C:\Program Files (x86)\Qt Designer\designer.exe
